COPPER MINES OF ELY, NEVADA

Are Counted Upon to Make a Stir in Red Metal Field.

AMERICAN'S NEW SMELTER

PLANT ON LAKE SHORE TO BE WORLD'S FINEST.

Leading mining engineers have recently expressed the opinion that within a few years Nevada will take a prominent place among the leading copper-producing states in this country. Important and valuable deposits of copper ore have been opened in the Ely district, says the Boston News Bureau. This camp, however, is not yet a producer of copper because of a lack of railroad facilities, it being 150 miles from a railroad connection. There are already two prominently developed copper companies in that district, the Nevada Consolidated Copper compa-ny and the Giroux Copper company, in both of which Boston capital is interest-ed

It was recently stated that A. F. Holden and a party of engineers affiliated with the United States Mining company were also exploring this district, they realizing the value of the deposits there and the contemplation of immediate improvement of railroad facilities.

The Nevada Consolidated company has lately sold a block of its treasury stock to New York, London and Boston interests, and is now financed for \$2,250,000. One and a quarter million dollars of this is to be spent for a standard-gauge railway to connect the Nevada Consolidated mines with the South Pacific railway, is to be spent for a standard-gauge railway to connect the Nevada Consolidated mines with the South Pacific railway, with which a long-time favorable traffic contract has been made. In addition to handling the freight of the Nevada Copper company this road is bound to do a large general traffic with the other mines which will now be opened in this district on the completion of its transportation facilities. This railroad was started some two weeks ago, and at the present time there are 150 horses and ninety men on the ground. The road is being built by the Utah Construction company under

An Old Camp That Is Just Beginning to Shine Again.

The Overland mine in Silver City has been sold for \$25,000, the sum of \$6,000 being paid down, says the Carson News. The new owners are Denver people, and it is understood that a shaft will be sunk to the sum of the sum

on the property to a depth of 500 feet and a modern mill and cyanide plant installed. The parties who recently purchased the Hayward mine, in Silver City, will in the near future install an electric hoist, modern mill and cyanide plant, and work the property on quite an extensive scale. It is estimated that there are over 100,000 tons of milling ore now in sight in this property.

Experts are at present making an examination of the Lager Beer mine, in Silver City. This property should go, as it has been a producer for some years past, having \$150,000 net to its credit.

The Silver King mine, owned by A. A. Smith, has been bonded for \$15,990. A sale of this property is almost assured, as the report of experts on the claim is very favorable, and the producers in Silver City. Eastern capitalists are the people who hold the bond.

The old Dayton mine, in lower Silver City, is under bond, at the present time for \$30,000 and is being inspected and sampled by expert mining men. A sale is sure to result. There are great possibilities for this property, as the vein is 100 feet wide between walls, with an approximate value of \$6 ner ton.

The old Dayton mine, in lower Silver City, is under bond, at the present time for \$30,000 and is being inspected and sampled by expert mining men. A sale is supported to result. There are great possibilities for tigs property, as the vein is 100 feet wide between walls, with an approximate value of \$6 per ton.

The group of mines handled by F. A. Bierke, including the famous Oest mine, will shortly be inspected by Chicago capitalists. If a sale occurs the price will run well up in five figures. A specimen of ore from the Oest, it will be remembered, brought to Nevada the blue ribbon for exhibits of quartz specimens at the Chicago exposition.

An offer of \$10,000 has been made and

Chicago exposition.

An offer of \$10,000 has been made and refused for the Buckeye mine. This mine has been a good producer for the past two years, under the management of

NAY AUG ORE BODIES.

Exploration Drift in Wood River Zine RUSSIAN SOLDIERS Co.'s Mine Makes Fine Showing.

Co.'s Mine Makes Fine Showing.

There is speaking conservatively, a good 330,000 worth of lead-sliver ore in sight in the exploring drift that is being driven in the Nay Aug mines of the Wood River Zine company, says the Wood River Times.

This is either a new shoot or a continuation of that in the lowest level from the shaft, whence the miners were driven by an inrush of water when the property was owned by a company composed mainly of St. Louis men.

There being ore for over 200 feet along the top and bottom of the drift, this, if a separate shoot, is already proved valuable, while if it is merely the southern extremity of the old shoot, the Nay Aug is a great mine, as the shaft is fully 700 feet from the portal of the drift.

Of the ore in sight in the drift above referred to, ten inches or more is solid galena that is worth about \$100 a ton.

This ore extends above at least seventy feet, as developed by two winzes, and continues in the floor of the drift.

WILL OUTSTRIP ANACONDA.

American Company's New Plant to

The plaus of the American Smelting & Refining company in Utah are most stupendous in character and contemplate the erection of reduction works that shall be capable of caring for the rapidly increasing copper product of that servion, which is forging to the front so rapidly, rivaling, if not actually surpassing Anaconda, says Denver Ores and Metals. The company will erect on the shores of the Great Sait lake a plant to cost not less than \$2.000,000, and already an army of workness of ground have been purchased—there is to be no chance of damage suits on the part of owners of land of doubtful value for alleged damages to crops by reason of smelter fames. Grades are being constituted and ramense trackage instituted Be Finest in the World.

to care for the great work now in progress, and machinery is beginning to arrive. This new plant will be the highest possible type of the modern blast furnace. The entire smelting plant will be without a peer in point of size and efficiency.

without a peer in point of size and efficiency.

This leaves the Utah Copper company free to hurry the work on the new concentrator works, capable of handling 6,000 tons of crude ore daily, the concentrates from which will be shipped to the new reduction plant, and the mines of Bingham, which are steadily developing greater bodies of higher grade ore, will find a market equal to its produce in the new plant being erected by the American company. Whether this company will abandon its plant, in time, south of Salt Lake City is not known, but one thing is certain, and that is that the principal smelting will be done on the shores of Salt ake, and that its reduction plant, at that point will be one of the best that can be constructed.

SILVER'S ADVANCE CERTAIN.

Government Needs Relied Upon to Send Metal to 70c an Ounce.

Send Metal to 70c an Ounce.

The demand for silver coins of small denominations will compel the director of the mint to commence the purchase of silver gagin, and the congress is to be asked to give its sanction. By the repeal of the purchasing clause of the Sherman act, relating to the coinage of silver, we believe; but permission is to be asked of the congress to do so, nevertheless, says Ores and Metals. The demand that will be created by such a step will in all probability cause a still further advance in the price of the white metal. The call upon the department for fractional silver, while hardly noticeable from one point, in the aggregate forms a tremendous total, and that it will stimblate the silver mining industry to greater effort there is no doubt. Steady purchases on the part of the government and the continued demand from the Orient will create a market that will revive a number of vidence camps of the west, and 70-cent silver would not he a venture-some prediction.

The steady advance in the price of silver during the past few years has undoubtedly been due to the influence of the American Smedling & Refining company in controlling the market of this metal. In doing this, the price of silver during the past few years has unwork. That the price will stream on which operations had ceased to resume work. That the price will stream on which operations had ceased to resume work. That the price will stream on which operations had ceased to resume work. That the price will stream on which operations had ceased to resume work. That the price will stream on the continued of the American Smedling & Refining company to controlling the next few years there is little doubt, though, in the very nature of things, it cannot reach the figures that obtained prior to 1883.

Fuel & Iron company, and it is believed the road will be fhilshed on contract time.

The plans for the smelter are now completed and have been thoroughly gone over by the engineers connected with the American Smelting and the Amalgamated interests that there need be no change in the plant after it is once erected. It is proposed shipping parts to the smelter on March I so it will be completely finished by. Oct. I, 1906.

J. Parke Channing has recently reported on the Nevada Consolidated property and gives it a tonnage aiready blocked out of about 6,000,000 tons. He also states that he believes the extension of the production of 2,000 tons of ore per day for many years to come, and that its annual production should be 25,700,000 pounds. He figures a net profit of \$1,500,000 on a 15-cent copper market.

The president of this company is James Philips, ir., well known as a director in many of the Amalgamated sub-companies, the Utah Consolidated, Tennessee Copper, Greene Consolidated Copper and other mining companies in which the Standard Oil and Lewisohn people have interests.

F. W. Bradley, the representative of the American Smelting & Refining company on the Pacific coast, is the consulting engineer of the company. M. L. Requa of Nevada is the general manager.

GRABBED THE MONEY.

Two Prominent Lawyers Got to "Swiftwater Bill" First.

Seattle, Wash., Oct. 8 .- George B. Cole and John C. Murphy, prominent attorneys, are accused by the lawyers of record in the report has not yet been released. This property, however, is looked upon as the best producer in the camp. The mine is being worked at present at a depth of 200 feet, and a Dow pump, operated by steam, has been installed to handle the water which comes in at that depth. New drifts are being run in high grade ore. The ore in this mine is so rich that thousands of dollars have been pounded out of the rock in a hand mertar.

Several mining properties in Spring Valley are under careful management of reputable mining men, and reports from the same are very flattering. and John C. Murphy, prominent attorneys

ALONG THE FRONTIER

Tokio, Oct. 8, 7 p. m.—It is reported here that Russia will station 30,000 troops on the Chinese frontier after peace has been declared, partly because she is apprehensive of the soldiers joining the malcontents at home and partly for intimidation of the Chinese. It is expected that the railway obtained by the Japanese from Kwangchentse southward, although it will require an initial investment of about 312,500,000, will ultimately be a paying property, chiefly because of the revenues derived from the Yentai and Pushun colleries.

PASSED THROUGH TOKIO.

Tokio, Oct. 8, 3:20 a, m.—Miss Alice Roosevelt passed through this city this afternoon en route to Nikko. She was met at the station by the governor of the city and the master of ceremonies and driven to Uyeno in an imperial carriage, where she took the train for Nikko. She appeared to be in excellent health.
